

# Saman Zand Haghighi

Full-Stack Web Developer

## About Me

I'm an accomplished Full-Stack Developer with 4 years of hands-on experience in Python. During this time, I've successfully delivered a range of projects, from web applications to backend systems, which have deepened my expertise and proficiency in Python development. Additionally, I have 1 year of proven experience in Vue.js, creating engaging user interfaces. My dedication to innovation and problem-solving drives me to stay updated with the latest technologies. Eager to contribute my skills to impactful projects and collaborate with dynamic teams. Samples available on GitHub. Let's achieve excellence together!

## Employment History

### Full-Stack Developer

#### Pezeshkino

Description:  
This project aims to alleviate the problem of booking doctors. Also, this project is greatly inspired by nobat24.ir, paziresh24.ir, and nobat.ir. Also, we simulate the process of payment using Zibal.

Technologies used:

- Django, Django REST Framework, Dj-REST-Auth
- Vue.js, Vee-Validate, Vuex, Vue Router, TailwindCSS
- Docker, Docker-Compose, Git, NGINX, Gunicorn

### Back-End Developer

#### Rubik-Food

Description:  
This project aims to solve the problems relating to making a good connection between clients and restaurants. This project is greatly inspired by SnapFood.

Technologies used:

- Django, Django REST Framework, Django-Allauth, Django Channels
- Redis, Elasticsearch
- Bootstrap, jQuery
- Docker, Docker-Compose, Daphne

### Full-Stack Developer

#### Portfolio

Description:  
This is my personal portfolio project. Also, I've implemented a fully-featured blog in it.  
Link: <https://samanznd.ir>

Technologies:

- Django, Django REST Framework, GraphQL
- Vue.js, TailwindCSS, Vuex, Vue-Router, Swiper
- Docker, Docker-Compose, NGINX, Daphne

### Back-End Developer

#### Quera-Problems

Description:  
This repository contains my answers to Quera-Contest problems, problems like problems of Leet Code. These problems are usually in Django and Python.
